LETTER ACCOMPANYING PRE-APPEAL BRIEF
REQUEST FOR REVIEW

Sir:

Applicant requests review of the Final Office Action mailed November 14, 2006. This letter is filed concurrently with a Notice of Appeal and form SB33 requesting pre-appeal brief review. As explained in detail below, the Applicant respectfully submits that the Examiner has made errors of fact and law in applying the prior art to the pending claims, and has failed to find all elements of the independent claims anticipated by the prior art. Accordingly, the application is not in condition for appeal and Applicant should be spared the time and expense associated with the preparation and filing of an appeal brief. Applicant further requests that the pending claims be allowed, or alternatively, that prosecution be reopened and an appropriate Office communication issued in due course.

Claims 1-25 are in this case. Claims 1-12 have been allowed. Claims 13-25 have been rejected under § 102(b) or § 103(a). Specifically, claims 14-18 have been rejected under § 103(a) over Gerstel in view of Tobinaga et al.

Rejections Based on Improper Reference

The rejections of claims 14-18 are based on a combination of references relying in part on Tobinaga et al. (US Patent Application Publication No. 2005/0065463). Tobinaga et al. was filed September 18, 2003, and first published on March 24, 2005. Thus the earliest date from which this reference can be applied is September 18, 2003, under § 102(e).

The present application was filed as International Patent Application No. PCT/IL03/00165 on March 4, 2003, more than six months earlier than the filing date of Tobinaga et al. As a result, the Tobinaga et al. reference is not applicable as prior art against the present invention, and the rejections of record of claims 14-18 are legally in error.

In view of this clear legal error in the Final Rejection, the Applicant respectfully submits that this case is not ripe for appeal.

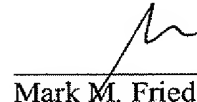

Status of Amendment After Final Rejection

Since claims 14-18 are not currently subject to any valid rejection, these claims are assumed to contain allowable subject matter and should have been designated by the Examiner as "objected to". In view of this fact, Applicant submitted on February 9, 2007, an amendment after Final Rejection rendering claim 14 into independent form (as amended claim 13). The claim language was further amended (narrowed) to address an issue of clarity raised orally by Examiner Paul Smith who was formerly responsible for this file.

In view of the corrected status of claim 14 as "objected to", Applicant believes that this amendment renders the claims in condition for allowance, conforming the claims to allowable subject matter. The Applicant therefore requests that the amendment be entered and the application allowed.

In the event that the claims are not found to be allowable for any reason, the Applicant believes it necessary that a further action be issued on the merits in which the status of claims 14-18 would be clarified.

Respectfully submitted,

Mark M. Friedman
